# haha

---

title: Example Markdown author: Jordan Mandel date: today output: md*document: variant: markdown*strict ---

# FIRST LEVEL

```
pandoc markdown_example.md -s -f markdown_strict -t pdf -o
markdown_notes.pdf --pdf-engine wkhtmltopdf
```

## second_level

Sphinx of black quartz judge my vow.

# First Level

### Third level

> here we go with editing a line
>
> > another block quote
> > does it double?
> > I hope so
> > ok enough
> > done

### fourth level

I feel normal

*I feel angry*

**I feel inuriated**

- So far some things seem not to work
- nested block quotes are among them
- above we see we don't insert a line break after a fourth level header
- will have to check out pandoc markdown (as opposed to strict markdown) to fix

1. I hope that markdown will help me write better documents.

2. Maybe I'll move on to LaTeX.

   Latex is a nice typesetting system.

   I hope to use it someday.

   See, multiple paragraphs.

Here we go with a complete classic. Adding a title doesn't seem to work for now ladeedaa

I strongly recommend against using any `<blink>` tags.

I wish SmartyPants used named entities like `&mdash;` instead of decimal-encoded entites like `&#8212;`.
